Express Talk featuring Emphasys Software

The Multifamily and Tax Credit environment is changing rapidly. Is your technology ready to keep pace? Are you ready to move down the path of RAD conversions including PBRA and/or Tax Credits? Typically, your technology is an afterthought when it should be part of the overall conversion and transition process. This brief session will introduce ways to make your life a little easier with Rent Validations and Subsidy tracking, an important part of the new paradigm. We find many agencies are facilitating the conversion through manually calculating the rents and entering the data as a retrofit into their technology systems incorrectly. This session will show you how you can ensure the information is accurate, easy to perform, and auditable.
